

BERNARD CONTROLS

partner of the Oil industry

BERNARD CONTROLS actuators are mainly used on isolation valves at all stages of the oil production process.

Platforms

Manifold, Chokes valves on/off, and modulating

Refinery

Cracking process, Cooling water system, Utilities, Product Transfer pipelines

Oil terminal

Ballast & oil loading system, Metering, Pumping

Separation unit

Pumping, Manifold, Metering skid

Oil Tanker

Loading valves, ballast

Oil wells

Manifold, Chokes valves on/off and modulating

Storage

Tank, Pumping station, Loading arms, Launch & receiving facilities - Pigging, Metering skid, Vapor recovery unit, Fire-fighting

Pipeline pumping station

Pumps' Isolation valves, pipe isolation valves

Storage

Tank, Pumping station, Loading arms, Launch & receiving facilities - Pigging, Metering skid, Vapor recovery unit, Fire-fighting

Storage

Tank, Pumping station, Loading arms, Launch & receiving facilities - Pigging, Metering skid, Vapor recovery unit, Fire-fighting

Refinery

Cracking process, Cooling water system, Utilities, Product Transfer pipelines, Fire-fighting

Oil terminal

Oil unloading system, Metering, Pumping
